Dear All,

the IV Italian GREAT Network Congress will be held from 14th to 18th October in Rome, in a new, beautiful venue: the Police Academy.

The 2012 edition confirmed the success of an initiative where more than 450 participants coming from all over the world debated issues of great scientific importance in the field of acute diseases. I wish to thank all the people that demonstrated high regard for our efforts and all the sponsors who supported us.

I also would like to remind the 43 posters presented, confirming the great interest that the event developed within young Researchers. Two of these were chosen and financed as research proposals while 5 awards have been assigned to excellent contributions from the young fellows.

Moreover 10 papers, as proceedings of the 2012 meeting, either in the form of consensus positions or original research contributions, have been already published in international journals.

Even for the 2013 edition, the watchwords are Innovation and Research, with a special focus on acute cardiovascular diseases management.

190 Speakers and Chairmen, from 25 world countries, coming from the total 40 ones of the GREAT Network members, will be in Rome to debate on Innovations and on Research results in acute conditions.

Moreover, this year we will open with a special session on "Violence on women" where Italian and International experts of Emergency Medicine, Psychology and Prevention&Security will discuss and make operative solutions for such a worldwide current and difficult issue.

For those who do not know us, the GREAT Network is an Academic Research Organization, operating as an International Network between experts in the management of acute diseases.

The GREAT Network also aims at standardizing the clinical and organizational approach in acute conditions management, developing the globalization of health care.

The main objective of our team is to let the researchers networking with the concept of Translational Medicine, which is the emerging view of medical practice and interventional epidemiology. It integrates basic and clinical research inputs to optimize both patient and preventive care. In this attempt this year during our meeting in Rome, a particular attention will be dedicated to biomarkers utility in the Emergency Room.

Every day there will be a «Focus on Session» where the best international experts from different backgrounds (Emergency physicians, cardiologists, intensivists, clinical biochemistries, radiologists, neurologists, nephrologists, gastroenterologists, surgeons, orthopaedists, pediatricians, lung specialists, basic researchers, nurses, engineers, etc.) will work together to formulate consensus opinion papers on the basis of the more concrete evidence in literature. Selected abstracts and papers will be published in international journals with impact factor at the end of the Congress.

As for past editions, again a large space will be given to the contributions of young researchers, also in a dedicated "Fellows on stage" and poster sessions, with the possibility to obtain research grants and publication of contributions.

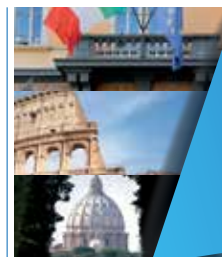

On behalf of the GREAT Network I invite you all to participate in the IV Italian GREAT Network Congress and to enjoy the beauties of Rome.

With my best regards,

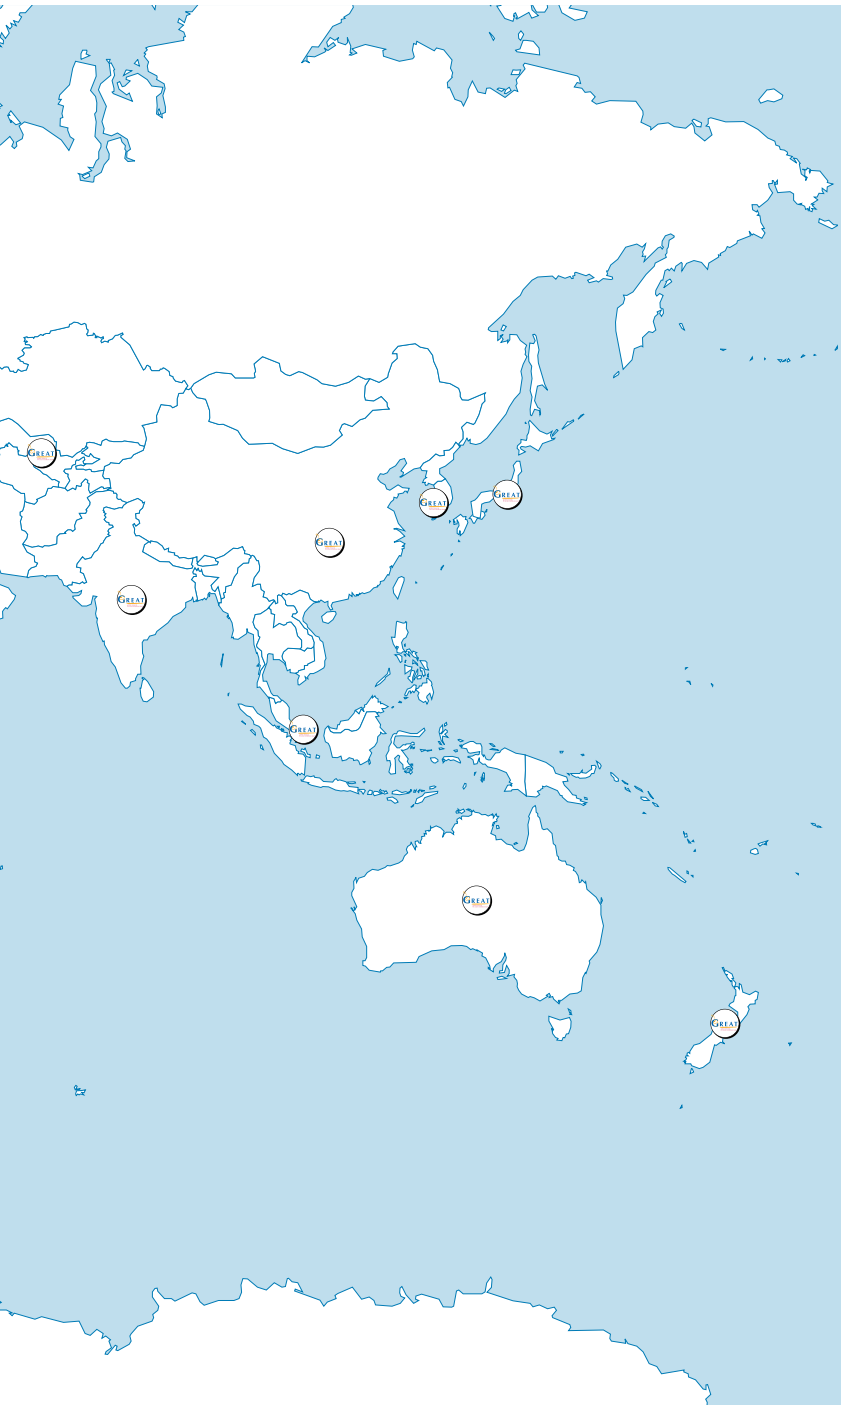

Prof. Salvatore Di Somma
President of the GREAT Network Italian Committee
GREAT Network Vice President

GREAT Network on the WEB

From January 2013, a brand **new GREAT Network website** is online: www.greatnetwork.org

Through this new website, information sharing between all GREAT members will be much easier.

It has a public area with general information on the GREAT Network activities, while **registered Members** can have access to some **important information** (like meeting documents or ongoing researches) just logging in the website, and receive the **GREAT Newsletter** with updates on the Network activities and scientific news.

Also, registered Members have the possibility to write articles on their research activities directly through the website, that will be subject to the approval of the Scientific Board before publication on the website.

If there is something you wish to propose for publication on the website (links, documents, pictures, etc.), just please send it via e-mail to info@greatnetwork.org

The GREAT Network is also on **Twitter** now, please follow us: **GREAT_Network** so that you can receive updates there also!

If you wish to suggest your colleagues to register to the GREAT Network, you can tell them to visit the website and fill in the registration request here <http://www.greatnetwork.org/int/registration.html>

Waiting for you online!

THE POLICE ACADEMY

INVOLVEMENT AND TRAINING FOR A CULTURE OF SECURITY

Being unique means being the only law enforcement training establishment offering a professional postgraduate qualification. This is the “Scuola Superiore di Polizia”: training for a culture of security.

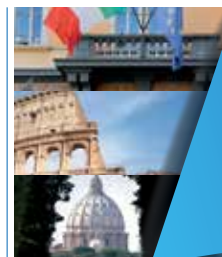

The Presidential Decree of August 1st 2006 entrusted the Academy with the ambitious task of organizing and holding basic and on-going advanced training courses, specifically designed for police managers.

Those taking the initial training courses for “Commissari” are expected, a few years later, to up-date and develop their managerial abilities as police Executives (“Dirigenti”) by attending specific courses at the Academy.

Two years to become “Commissario Capo”; 24 months of lessons, research activities, exams, seminars, on field training and apprenticeship periods at the end of which the “Commissari” gain a Master’s Degree in “Security Science”(in cooperation with the Faculty of Law of the University of Rome “Sapienza”). The “Scuola Superiore di Polizia” also organizes training courses for police Technical Managers aimed at obtaining a Master’s Degree in “Police Management Engineering” (in cooperation with the University of Naples “Federico II”) as well as training courses for Police Medical Directors, at the end of which a Master’s Degree in “Health Science for Police Services” is recognized (in cooperation with the University of Rome “Sapienza”). In the end, as mentioned before, courses specifically tailored for the newly-appointed Executives are also held. As from 2001 the “Scuola Superiore di Polizia” has been organizing courses for the highest ranks of the State Forestry Corps too.

Many subjects, numerous training curricula, a diversified didactic offer for a real “Security University”.

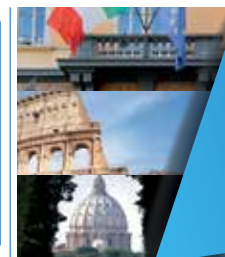

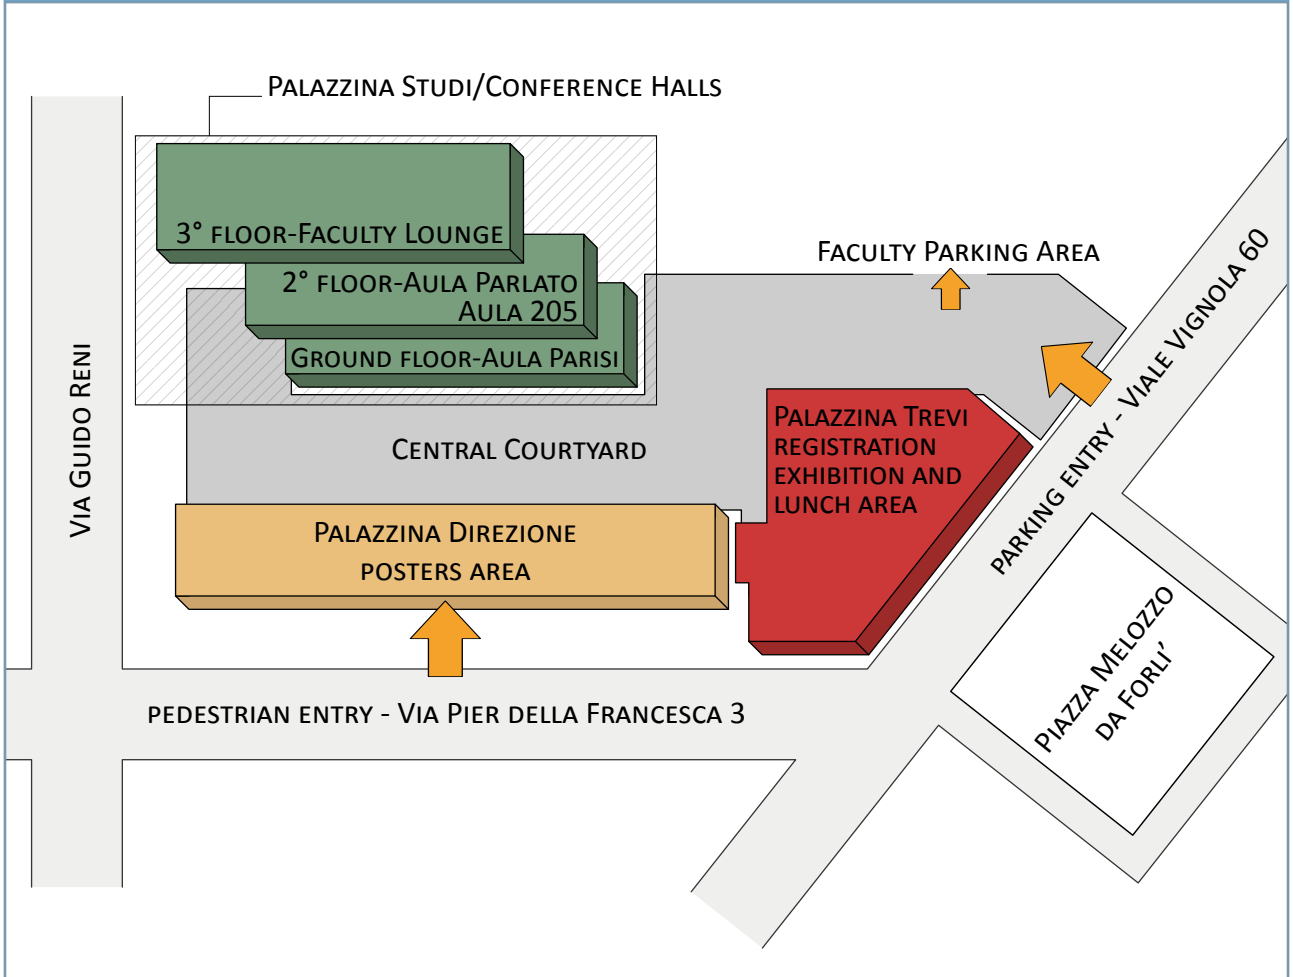

During their didactic career the trainees attend lectures delivered by academic professors and by veterans in the fight against terrorism and organized crime. They develop practical skills and technical abilities through apprenticeship periods, but they also acquire a high sense of state, the inspiring values of the Police force, the sense of belonging and team spirit. This is the philosophy inspiring the training mission of the Academy, aiming at shaping a future police manager faithful to the State Police principles.
